AQUACULTURE
WATER & SOIL PROBIOTIC

Fidarfeed
Performance Evolution

Key Benefits:

- Enhances water and soil quality
- Controls pathogenic bacteria
- Decomposes sludge and organic waste at the pond bottom

AQUACULTURE
WATER & SOIL PROBIOTIC

Fidarfeed
Performance Evolution

Active Ingredients:
- Bacillus subtilis
- Bacillus licheniformis
- Bacillus pumilus
- Bacillus megaterium
- Total Viable Count: 1.5×10^9 CFU/g
- Carrier: Dextrose and Maltodextrin powder

Dosage & Application:
- Apply 500 to 1000 grams per hectare, depending on water conditions and pond quality.
- Repeat the application every 7 to 10 days as needed.
- In case of black soil formation, sludge buildup, or hydrogen sulfide odor, double the dosage for optimal results.

Suitable for Use In:
- Shrimp farming
- Warm-water fish farming
- Cold-water fish farming
- Shrimp hatcheries and grow-out ponds

Product Form:
Water-soluble powder
Mode of Action & Performance Benefits:
- Breaks down organic matter, animal residues, fat deposits, and pond bottom sludge
- Improves pond environment by reducing ammonia, hydrogen sulfide, nitrate, BOD, and COD
- Supports the development of beneficial bacteria and phytoplankton for biofloc formation
- Inhibits pathogenic bacteria and promotes beneficial microbial activity
- Helps control Vibrio spp. and blue-green algae
- Enhances survival rate, growth performance, and feed conversion ratio (FCR) in fish and shrimp

Shelf Life:
18 months from the date of manufacture.
