TMR SILAGE ANIMAL FEED

Fidarfeed
Performance Evolution

Key Benefits:

. Provides all the essential nutrients your animals need – can be used as the sole feed in specific conditions like rural farming, nomadic herding, or during droughts

. Available year-round with consistent quality

. Improves digestion and nutrient absorption by supporting beneficial rumen microbes

. Enhances coat shine, hoof health, and overall vitality

. Helps with better feed management at the storage and feeding level

. Highly palatable, even makes low-value feed ingredients more appetizing

. Efficiently utilizes high-moisture by-products and waste materials

. Supplies part of the animal's water needs, which is vital during migration or water scarcity

. Reduces feeding costs and improves farm productivity

. Saves time and makes feeding livestock easier and more consistent

TMR SILAGE ANIMAL FEED

Fidarfeed
Performance Evolution

What is it?

TMR Silage Animal Feed, is a specially formulated, processed feed made from a blend of agricultural and food industry by-products. It undergoes fermentation after thorough mixing, resulting in a complete and ready-to-use ration for livestock.

Ingredients:

- Fresh agricultural by-products (wet pulp and peels)
- Fibrous roughage (such as straw and alfalfa)
- Protein and energy concentrates
- Probiotics
- Yeast
- Anti-fungal compounds

Product analysis in 100% of dry Matter:

45%	16%	2650 Kcal/kg	1650 Kcal/kg	1090 Kcal/kg	1750 Kcal/kg
Dry matter (DM)	Raw protein (CP)	Metabolizable energy (ME)	Net Energy for Lactation (NEL)	Net Energy for Growth (NE.g)	Net Energy for Maintenance (NE.m)
5.3%	40%	22%	36%	3.5%	3%
Fat (EE)	Fibers insoluble in neutral detergent (NDF)	Fibers insoluble in acidic detergent (ADF)	Non-fibrous carbohydrates (NFC)	Calcium (Ca)	Phosphorus (P)

Key Benefits:

. Provides all the essential nutrients your animals need – can be used as the sole feed in specific conditions like rural farming, nomadic herding, or during droughts
. Available year-round with consistent quality
. Improves digestion and nutrient absorption by supporting beneficial rumen microbes
. Enhances coat shine, hoof health, and overall vitality
. Helps with better feed management at the storage and feeding level
. Highly palatable, even makes low-value feed ingredients more appetizing
. Efficiently utilizes high-moisture by-products and waste materials
. Supplies part of the animal's water needs, which is vital during migration or water scarcity
. Reduces feeding costs and improves farm productivity
. Saves time and makes feeding livestock easier and more consistent

Feeding Guidelines:

- Small ruminants (sheep and goats): 0.5 to 1.5 kg per head daily
- Large ruminants (dairy cows, beef calves, camels): Up to 5 kg per head daily

How to Use:

Feed it alone or mix it with other components (forage and concentrate) and offer as TMR (Total Mixed Ration).
When switching from a different feed, make the change gradually over at least 4 days to avoid digestive upset.

Storage Instructions:

Keep in a cool, dry place. If the bag is unopened, it can be stored for 4 to 6 months.

Packaging:

Packed in multi-layer UV-protected plastic bags, each weighing 32 to 38 kg.
